Work Experience

Senior Fullstack Developer

Freelance

Apr 2023 - Current

- Built various websites and applications using Javascript, Typescript, React, Node JS, Python, REST, GraphQL as an external contractor.
- Handled communication, project organization, selection of tools, and end-to-end implementations.

Senior Fullstack Developer

Sana Benefits

Oct 2021 - Feb 2023

- Developed multiple projects using React, Ruby on Rails, and PostgreSQL, and collaborated with stakeholders and external vendors to ensure successful project delivery
- Improved the claim processing system, increasing the auto adjudication rate from 60% to 80%
- Built an internal tool that allowed the people operations team to handle claim edits without engineering support, decreasing engineering support tickets by 30%
- Onboarded and trained new employees on company technology and processes
- Contributed to a mid-sized startup focused on revolutionizing healthcare with greater access and lower prices, demonstrating a passion for making a positive impact in the healthcare industry.

Fullstack Developer

Edison Interactive

Mar 2020 - Oct 2021

- Developed full-stack web applications from the ground up using Vue.js, AWS Lambdas, and GraphQL in a small startup environment.
- Lead development in a project to create a web-based analytics platform for Android devices that had been outfitted as touchscreens in rental cars.

Fullstack Software Developer

Digital Innovation Groups

Jan 2019 - Mar 2020

- Developed a collaboration platform for the academic humanities using Vue.js and Django, contributing to the advancement of academic research and collaboration.
- Improved platform functionality through the implementation of new features and bug fixes.
